Introduction

As if in the blink of an eye, we have completed another successful season of hunting. Graham Sales Safaris is grateful for another year of excellent sportsmanship and inimitable safari experiences. Africa’s beautiful landscapes delivered exceptional hunting and breathtaking moments for all who shared in our intrepid adventures this year. This brief overview may offer a glimpse into some highlights of 2019:

The season kicked off as early as March in the breathtaking Klaserie; it was Buffalo hunting at its best with Joe Jenny and Stephen Randazzo. GSS also navigated the formidable rainforests of Cameroon again this year; this time, with Carroll Moran in his quest for Bongo. We thoroughly enjoyed accompanying Dr Wood on the occasion of his 12th hunting safari, in a successful search of his 2nd Timbavati Buffalo.

Celebrating nature is also a celebration of life itself. Thus, it was, therefore, a great privilege to host the Feik family and friends for JJ’s unforgettable 50th birthday experience in the Northern Cape Kalahari. The world renowned Timbavati offered Scott Landers its bountiful reward of Buffalo, Hippo, Hyena and plains game. Finally, we ended the season with a landmark 18th safari for Harold and Carla Meyers.

I am excited about the opportunities available to our clients next year. These include being able to offer our clients exhilarating dangerous game hunting in central Mozambique in addition to our other hunting areas.

This past year’s successes have been built on the support of so many individuals. To mention everyone may be close to impossible. I would, however, like to thank my wife for her unfailing support. Furthermore, I believe that the particular caliber of clients we are honored to host are invaluable cornerstones of GSS’s success and returning clients are indeed a great blessing! My sincerest gratitude goes out to every client; past, present and future.

I humbly look forward to many more years at your service; with a heart and mind open to nature.

Best,

Graham

Graham Sales Safaris is proud to announce that we have been awarded the exclusive hunting rights by MTPA (Mpumalanga Tourism and Parks Agency) on South Africa’s largest Provincial Nature Reserve.

Songimvelo Nature Reserve
as well as
Mahushe Shongwe Nature Reserve
(no hunting occurred on both Reserves for a period of 6 years – 2011 till 2016)

The Reserve is the largest provincial reserve in South Africa and forms part of the Songimvelo-Malolotja Transfrontier Conservation Area, a peace park located south of Barberton in the south-eastern part of the Mpumalanga Province on the South African-Swaziland border.

The incredible beauty of its range of mountains, which forms one of the oldest regions on Earth, with incredible volcanic and sedimentary rocks, examples of which are exceeded only by those found in Greenland. Rolling hills, hidden valleys, wide open plains and forest ravines support an incredible diversity of wildlife, plants and habitats. Along the valley floor winds the Komati River, after which it flows into Swaziland and to the Indian Ocean.

The grassy plains of Songimvelo Nature Reserve are home to herds Buffalo, Blesbok, Blue Wildebeest, Eland, Impala, Red Hartebeest and Zebra whilst within the wooded and hillside areas one will find Giraffe, Kudu, Mountain reedbuck and Elephant. There are also numbers of White Rhino on the Reserve.

The Ghost and the Darkness film was shot at Songimvelo Nature Reserve in South Africa.

Komati River that runs through Songimvelo Nature Reserve

Luxury tented camp at Songimvelo Nature Reserve

Tents are all private and each with a breathtaking view

**SAFARI DAILY RATES**

- 1 Hunter / 1 Professional Hunter: $350/day
- 2 Hunters / 1 Professional Hunter: $450/day
- Observer: $300/day
- Arrival day: $350/person

- Daily rates include:
  - Services of an experienced, fully-licensed Professional Hunter and field staff.
  - Fully equipped safari vehicle for each Professional Hunter.
  - Accommodation and all meals in fully equipped and staffed tented safari camp or thatched safari lodge for the duration of your safari.
  - All field preparation of trophies.
  - Daily laundry in camp.

- Daily rates exclude:
  - Trophy fees on all animals taken or wounded.
  - License fees where required.
  - Government taxes on daily rates and animals not exported.
  - Accommodation prior to and after your safari.
  - Gratuities to staff and Professional Hunter.
  - Alcoholic beverages.

**HUNTING CONDITIONS**

Trophy hunting is available year round in South Africa, although our summer months (Nov. through Feb.) tend to be very hot and is also our rainy season. The best period is from March through end October. Due to the vastness of all the areas, the locating of game is done by travelling in a Land Cruiser hunting vehicle from which all hunting is done on foot.

Please visit our website regarding information on caliber and ammunition selection, Liability and Insurance as well as licenses and permits.

All our safari camps offer accommodation of the highest standard, whether in our traditional tented or thatched safari camps. These camps are comfortable and safe and we will cater to each guest’s individual needs. All rooms are private and have en-suite bathrooms, with hot and cold running water and flush toilets.

Camp staff will ensure that bathrooms are cleaned, rooms are tidy and laundry is done daily. GSS caters for specific dietary requirements when possible. Prior to your arrival, one will be required to fill in our Dietary Information Form to indicate your specific meal and beverage preferences. At GSS we will make sure each and every guest’s specific needs are taken into account and are well taken care of.

---

The reserve is privately managed and owned since 1974 by a family who are passionate for wild Africa and its wildlife and who are pioneers in the South African conservation industry. The reserve is in excess of 125,000 acres of continuous wild Africa which is home to four of Africa’s Big 5 (Buffalo, Elephant, Leopard and White Rhino) and it is carefully managed to ensure that the reserve maintains its natural ecological integrity. With Mopane and Acacia shrub, huge mountains, massive Baobab trees, dry riverbeds and some open plains areas and with more than 8,000 head of African game this is without a doubt one of Southern Africa’s prime conservation areas. Our luxurious camp is designed for privacy and comprises of 5 double rooms, all with on-suite bathrooms, electricity and all necessary amenities. Our guests will enjoy 5 star cuisine either in the central dining area or around the campfire at night. Our camp also offers a beautifully appointed open lounge area where one can relax after a hard days hunting (wi-fi available). We also offer exceptional bow hunting with permanent bow blinds that are large enough to hold up to 5 people. Blinds are strategically built at watering holes with shooting distances that range between 5-25 yards.
The associated reserves is an association of privately owned nature reserves bordering on the Greater park, collectively they present 444 789 acres of land dedicated to conservation. In June 1993 in recognition of the importance of the area, the fences between the Greater Park and the associated reserves were removed to encourage natural wildlife migration.

Man’s incursions into this part of the Lowveld have always been temporary and brief, from early Stone Age down to the early 20th century. In point of fact, large tracts of land in the northern portion of the Lowveld were never permanently settled by man. The lands now comprising the Reserves were barely touched, and are still only lightly inhabited.

This part of South Africa’s bushveld region may therefore be regarded as truly unspoiled and deserves recognition as genuine wild land, as opposed to the “restored” and “restocked” lands commonly found elsewhere.

The terrain is undulating with altitudes varying between 980ft and 1640ft above sea level. The area is characterized as ‘savanna bushveld’ with 6 different landscape types, the most prevalent being acacia and open woodland with Mopani scrub in the northern parts. With natural watering holes and riverbeds in combination with the favorable terrain it is the perfect habitat that attracts a huge variety of game that includes Elephant, White and Black Rhino, Buffalo, Zebra, Blue Wildebeest, Kudu, Impala, Giraffe, Waterbuck, Warthog and some smaller antelope. These in turn attract a number of predators, such as Lion, Leopard, Cheetah, Wild Dogs and Hyena, which makes this a popular choice for a ‘real’ African wildlife experience.

In essence Savanna is classified as a vegetation type consisting of both a tree and grass layer with complex interactions between these two structural layers.

Graham Sales Safaris offers exceptional hunting in the Klaserie and Timbavati Private Nature Reserves. Clients will experience a total free range hunt with a classic African tented camp in the Timbavati and thatched Safari camp in the Klaserie. It is definitely one of the best and premier dangerous game hunting concessions in Africa today where one can see numerous Elephant and around 2,000 - 3,000 Buffalo in a seven day hunt.

THE FOLLOWING SPECIES ARE AVAILABLE ON QUOTA.

Buffalo Bulls  Bulls are categorized for conservation and management purposes. Please contact us for details.
Buffalo Cows Only old cows older than 10 years of age may be hunted
Elephant Bulls are categorized as follow for conservation and management purposes:
30lb Bull (tusk weight per side)
40lb Bull (tusk weight per side)
55lb Bull (tusk weight per side)
Hippo It is recommended that only adult or past-prime Bull be considered for hunting

Please contact our offices for a detailed quotation on hunting any of the above-mentioned species. Please note that permits are allocated 18-24 months in advance.

Nestled in the Northern Cape Karoo grasslands of South Africa one will have the opportunity to hunt a wide variety of indigenous species in this 112,000-acre semi desert area. Both these areas will provide ample opportunity to experience the very best the Northern Cape has to offer. These areas are home to exceptional Gemsbok, Kudu, red Hartebeest, Eland and the 4 Springbok species to name but a few!

The brand new Karee lodge is a superb development that fits right into this historic part of the country that dates back to 1881 when the first trading post was opened here by the pioneering hand of John William Wright.

A Northern Cape adventure second to none awaits at Karee and Thuru Reserves!

Mozambique

Graham Sales Safaris – Marangira – Northern Mozambique

- It’s not far-fetched to state that northern Mozambique may become the most sought after safari destination in Africa.

We hunt 988,000 acres in pristine wilderness in the Niassa province - North-western Mozambique. The area is situated north of the small town, Marrupa and south of Block C – Niassa Reserve. The concession is flanked on the left by the Ruambeze and on the west by Lureco rivers. The main habitat is Miombo woodland with some open Savannah areas, seasonal wetlands and riverine forests along the many water courses, rivers and streams. The landscape is scattered with spectacular rock formations and mountains, many of them thickets of montane forest growing in the narrow gullies that extend up the smooth – sided rock faces. The magnificent scenery combined with the vastness of the area, abundance of game and pristine nature makes this without a doubt one of Africa’s last great wilderness areas.

Our Marangira area is home to prolific wildlife, including Elephants and more than 60 of the critically endangered African Wild Dog. Leopard in abundance, Lions and Hyenas are common with big numbers of Buffalo, Roosevelt Sable, Lichtenstein Hartebeest and Livingstone Eland including three endemic species, Crawshey’s Zebra, Johnston’s Impala and Niassa Wildebeest.

*Personally I cannot believe or it will be hard to imagine an area with a higher population of Leopard, Roosevelt Sable, Buffalo and Lichtenstein Eland than this specific block.* In general, exceptional trophy quality goes hand in hand with high populations of game.

The hunting season starts in June and ends in November – personally we prefer the months towards the end of the season (September / October / November) for the following reasons; most of the tall grass has been burnt and new fresh grass is coming out which not only attracts game but one’s visibility is much better; the area does have a lot of forest growing in the narrow gullies that extend up the smooth – sided rock faces. The hunting season starts in June and ends in November – personally we prefer the months towards the end of the season (September / October / November) for the following reasons; most of the tall grass has been burnt and new fresh grass is coming out which not only attracts game but one’s visibility is much better; the area does have a lot of forest growing in the narrow gullies that extend up the smooth – sided rock faces.

TYPICAL HUNTING DAY

We always wake up very early each morning, have a preferred breakfast and leave camp before sunrise.

If Leopard is the priority specie, I strongly believe that one should focus on Leopard only. One will shoot bait animals while looking for new bait locations while checking existing baits. Once one is successful on the Leopard one can start to focus on Buffalo and all other species. (I’m not saying we will not take a desired trophy animal if the opportunity present itself but one has to focus on Leopard before one goes looking for some other specie and the Leopard hunt does not get the necessary attention that it requires)

If Leopard is not the preferred or priority specie one will look for fresh/Buffalo or Eland tracks to follow, most other plains game species are being spot from the back of the hunting vehicle from where a stalk is planned. (One might spend a few nights in one of our fly camps all depending on the desired specie)

We will have a packed lunch with us and will take some time during mid - day to have a meal and relax down in a riverbed or somewhere in the shade.

After lunch we will carry on hunting and slowly work our way back to camp. Due to the size of the area we usually get back to camp around sunset.

Back in camp one will take a hot shower, change into comfortable clothes and relax around the campfire, before getting back to camp after sunset.

LOGISTICS:

On the international flight one will arrive in Johannesburg from where one can take a connecting flight to Pembia in Mozambique.

From Pembia one will take a private charter flight straight to Marangira that leaves one with a 40 minute drive to hunting camp.

One can also take a connecting flight to Lichinga from where it is a 3 hour drive to camp.

Daily rates include:
- Luxury accommodation in fully equipped private hunting camps.
- The services of a Professional Hunter, camp and field staff.
- Fully equipped 4x4 safari vehicles.
- All field preparation of trophies.
- All meals and standard drinks during contracted safari.
- Meet and greet customs assistance at port of entry.
- Government concession fees, community and conservation fees.

Daily rates exclude:
- Animal license and trophy fees.
- Lion and Leopard baits and pre baiting.
- The hire of firearms, ammunition, selling, processing, packaging and transportation of trophies for exportation ($750.00).
- Transfers from Lichinga to base camp and back ($1,200).
- Hotel accommodation before and after the hunt, if applicable.
- Air charters, immigration and / or customs fees.
- Gratuities.
- All trophy fees exclude 17% Government tax.
- $2,100 government levy on all Leopard hunts.

NOTE:
- License fees subject to change as these are controlled and stipulated by the Mozambique Government.
- To ensure quota availability, all required trophy species must be reserved well in advance.
- US Citizens/ passport holders need a VISA to enter Mozambique - http://maputo.usembassy.gov/nevr.html

The area consists of 250,000 acres of private land with the Savé River (a 1-mile wide river), splitting the area into two blocks, 150,000 and a 100,000 acres respectively. The area shares a common open boundary with the world renowned Gonarezhou National Park for 16 miles with an abundance of game moving in and out of the Park. The area is mostly open savannah with huge trees and visibility in most places are up to 300 yards. There are currently two camps Cinzine Camp, north of the Savé River and Border Camp, which is located on the southern bank of the Savé River. Cinzine is a tented camp, each tent with en-suite bathroom facilities. From a food cliff, the camp overlooks the Savé River running through flood plains with the Gonarezhou National Park in the distance. Border camp is an old border post, revamped into a camp also with en-suite bathrooms but nestled in the corner where Mozambique and Zimbabwe meet on the Savé River. Buffalo hunting is by mostly done by hunting for fresh buffalo tracks and following them. Best times of the year are from June to September although you can hunt up to end of November. The latter months high temperatures force one to hunt from 4am to 11am and then again from 4pm. Buffalo sizes have up to now been above 40” with the average being 42”.

We get the following species on quota due to sustainable quantity. Elephant, Lion, Leopard, Buffalo, Crocodile, Hippo, Livingstone’s-Eland, Kudu, Zebra, Blue Wildebeest, Reedbuck, Nyala, Blue Duiker, Warthog, Bushpig. Common Duiker, Steenbuck and Waterbuck. The sounds of Hyena, Hippo, Lion, Elephant and Leopard often echo through the camp at night with the days being filled with the cry of the Fish Eagles.

We normally collect clients from Johannesburg and overnight in Tshipise or Punda Maria (inside Kruger National Park), splitting the trip into two, with a 150 mile and a 100-mile leg. It’s paved road up to Pafuri(South Africa – Mozambique) border and from there a dirt track for the next 75 miles and the last 25 miles runs through the hunting area, taking approximately 5 hours in total.

**Luangwa Valley**

The Luangwa Valley is one of Africa’s prime wildlife sanctuaries, with concentrations and varieties of game and birdlife that have made it world famous. The Luangwa Valley lies at the tail end of the Great Rift Valley as the Rift reaches Zambia; it divides; one arm to the east encompasses Lakes Malawi and the western arm becomes the Luangwa Valley. Down the center of the valley flows the Luangwa River, fed by dozens of sand rivers that come down during the rainy season. The countryside is spectacular in its rugged beauty, the vegetation thick and, near the Luangwa River and its many tributaries, a lush riverine forest occurs that is green all year round. Flanking the valley are two high western banks and the Northern and South Luangwa National Parks separated by the 30km Munyamadzi corridor. To the east, between the two main parks is another Park called Luambe. The development of game protection in the area began in the late 19th century when the British South Africa Company was administering the territory and they imposed a total ban on the hunting of hippo and elephant in the area. Today there is an over-abundance of hippo along the Luangwa River. We hunt both the north and the South Luangwa National Parks. Please contact us for a detailed quotation.
Mind and heart open to nature
